Description

TRADE-INS CONSIDERED

Upgraded 900HP Engines, Gyro Stabiliser, Hydraulic Thrusters, Hydraulic Teak Swim Platform, Twin 22” Garmin Displays & Miele Package

This beautifully specified 2024 Maritimo M60 presents an outstanding opportunity to secure a highly optioned example of Maritimo’s renowned M60 Cruising Motor Yacht. Designed for extended coastal cruising while equally at home entertaining family and friends, this M60 combines exceptional volume, sophisticated styling, serious offshore capability and an impressive range of upgrades throughout.

Powered by twin Scania DI 13 900HP engines matched to ZF gearboxes, this M60 benefits from a significant upgrade over the standard 800HP configuration. With a 4,750-litre fuel capacity, the vessel is exceptionally well suited to extended cruising. A Tohmei ARG 250T-1 gyro stabiliser provides outstanding stability both underway and at rest, while upgraded hydraulic bow and stern thrusters and a wireless Yacht Controller make manoeuvring and docking effortless, giving the skipper precise control from virtually anywhere around the vessel.

The helm is equipped with a comprehensive Garmin electronics package featuring twin 22” displays, providing a clear and intuitive navigation interface. The helm is further enhanced by upgraded electrically operated helm chairs, delivering additional comfort and convenience at the touch of a button. Further equipment includes upgraded radar, satellite TV and a higher SeaView mast, while the black-painted radar, domes and mast complement the M60’s distinctive exterior styling.

Cruising capability is further enhanced by an Idromar 130-litre-per-hour watermaker with sand filter, while the upgraded hydraulic teak-laid swim platform provides an exceptional platform for swimming, watersports and easy tender access. Blue Aqua Luma underwater lights add another level of ambience after dark.

The M60's expansive cockpit is perfectly suited to entertaining and outdoor living. The upper cockpit features a custom forward-facing U-shaped seating arrangement, complemented by port-side lounge seating, teak decking and a folding teak table. The lower Adventure Deck provides additional entertaining and utility space, including a stainless-steel BBQ provision, plate freezer and sink. Both the lower cockpit and flybridge are fitted with removable breezeway screens, providing flexibility and protection when required.

A Karcher pressure cleaner with dedicated hose reaching the bow is another thoughtful addition for keeping the vessel clean and ready for use, while the huge lazarette with electric actuators provides exceptional storage and easy access to equipment.

Up on the flybridge, the optional panoramic sliding windows enhance ventilation and connection with the outdoors, while the aft entertainment area incorporates a large U-shaped lounge, teak-laid balcony and dedicated balcony table. An external bar fridge and additional fold-out ottoman/coffee table add further versatility, making this an exceptional space for entertaining underway or relaxing at anchor. The flybridge is also equipped with a 43” electric-lift TV.

Inside, the saloon and galley have been finished to an exceptionally high standard. The Dune interior package combines Enviro Walnut gloss timber, Bianco solid-surface benchtops, Karndean Niveus flooring and upgraded

Disclaimer

upholstery in Tusk leather, creating a sophisticated yet practical interior. The optional panoramic sliding windows further open the saloon to the surrounding environment, while bifold doors provide a seamless connection between the galley and flybridge areas.

The interior has also been customised with bespoke bedheads and dowel timber accents throughout the master and VIP cabins, adding a distinctive level of craftsmanship and individuality to this M60.

The galley is exceptionally well equipped with the Miele appliance package, including a two-door refrigerator, convection microwave, rangehood and four-burner cooktop, together with a Fisher & Paykel dishwasher. Additional refrigeration is provided by a Miele wine fridge and twin-drawer fridge/freezer beneath the staircase, complemented by an ice maker for added convenience when entertaining family and friends. This M60 is particularly well suited to extended cruising and entertaining.

Entertainment has been taken to another level with a 50” saloon TV on electric lift, 43” TVs in both the master and forward staterooms, and a 43” electric-lift TV on the flybridge. An Apollo entertainment system with Krix speakers and saloon subwoofer, together with dedicated cockpit and flybridge Krix audio systems, delivers an exceptional onboard entertainment experience. Satellite TV is also fitted via KVH.

Power independence has also been carefully considered. An Onan 17.5kW generator provides ample capacity to keep the vessel's systems, air conditioning and appliances operating away from the dock. An upgraded shore power system with twin 32-amp inlets allows full use of the vessel's air conditioning and galley appliances when connected to shore power. An inverter and dedicated house battery bank also provide the ability to enjoy quiet time at anchor without the need to run the generator when generator power is not required.

Accommodation comprises three cabins, including a luxurious full-beam master stateroom, spacious forward guest/VIP cabin and twin-bed starboard cabin. The master features a king-size island berth, extensive storage and a dedicated ensuite, while the overall layout provides comfortable accommodation for extended family cruising.

Practicality has also been carefully considered, with a Miele washer/dryer combination, upgraded bathroom finishes featuring Bianco solid-surface flooring, generous storage throughout and a comprehensive mood lighting package creating a warm and inviting atmosphere throughout the vessel.
